THE BEST PLAN.

putting more bricks and mortar should follow. thereon. Under these conditions some other site or sites will have to be seen ed, before the situation can be satisfacinstructors we have been unable to distaught in separate buildings located on floor. Again in case of contageous ties of such a move was greatly increa-diseases the presence of one pupil in s.d. There is this much about it that

dred scholars and spread disease to in this county, or the iron-will have to every part of the city, making it im | be mined and shipped, and in either possible for quarantine regulations to ease a railroad will be an indispencontrol it, while in the case of the sable adjunct. Parties are becoming incourse of there were three school build- their purchases and developments Perhaps one of the strongest reasons direction will be in order. for the segregation of the school buildings is to be found in the distance that that some of the pupils have to go to attend. This in good weather and in Schator Willis Johnson of Piute full account of them we should have the case of large cupils is a disadvan- spent a day or two in our county this tage; inasmech as it consumes more or week, during which time they visited less of the time they ought to have for some of the Iron claims, and were deep other purposes, and particularly is this ly impressed by their richness and exthe case at the noon hour when it re tent. Ecuator Lewis is far to busy too quires about all the time allowed to go spend his time in objectives ramblings, versities and colleges to reverse the ora comparatively short distance, eat the and his visit to this part of the district der of things to a certain degree the meal and return, in time. This is son- is significant. Senator Johnson is alson last week of the season, and treat the ght to be remedled by those at a dist. man of affairs, and is not visiting the lestractors to a dose of their own mediance by taking their dinners with them fron fields for his health, of which eine or at least on these occasions, the but this is not to be compared with the commodity judging by his appearance students seem privileged to make pleasure of having a comfortable din- he already has a fair share. Mr. John- known to the faculty the way in which ner at home, neither in point of health son spoke hopefully of the coming of a their manner and treatment appears nor morals. But when the same coy railroad from Maryavale, to the Iron from a student's point of view. Th's ers the ground, and the cold winds of mountain country. Senator Lewis had is of course understood to be with the winter blow fiercely through the streets nothing to say at present of the busi- best of feelings, and the teachers are half past eight o'clock in the morning ganizer has his mind and business eye sort of tiding, and that some very telling to go nearly a mile to attend school on this section of the country. He does points were made by certain of the And what about their dinners; take it not appear at all inflated by his grow- youngsters who were supposed to fepreoff it and live in the air, or as they do the subscription list of Tun Record. in some parts, on the water. And where the population is so dense that childrent are better dead any way.

have things all their way, and often Iron County Record, abuse the little ones throwing them are ound taking their buts, and bonnets. ometimes whipping them and in short making them undergo all sorts of har dahips for fun. If they appeal to seacher they are called "Tattle tales, and in all probability will be thrashed by the large fellow as soon as he can get hold of them. It seems to be a nucl more sensible plan to have the instructor go to the children than to have the children go to him. In the one case it is an adult who is paid for the work, in the other it is a child who is not so able, and who gets no money. On the score of economy the small buildings certainly have the advantage. Three small school houses can be built with a capacity for hold-The best means of providing for the ling 75 or eighty scholars each, and araccommodation of the school in the ranged to accommodate the the first and way of rooms in which to study, and second grades in each section, much play grounds, has been engaging the cheaper than we can discard the prese attention of the board of trustees, and at building, buy expensive ground cento some extent the public for some time traily located and build a large buildpast, and as we have taken occasion ing big enough to hold the entire schto mention in connection with the ool population. In considering this account of the school meetings which matter let us use our own thicking aphave appeared in our columns as they paratas and not be governed by some have occured, various plans have been one else views simply because it is the suggested. Our school population has fashion. Let the advocates of centralout grown the present building, a year ization bring forth some better reason since, and some more room must be than mere custom or opinion; or even secured; and while their may be room convenience of the teachers. When we on the grounds to erect an addition, it build school houses we build them for is evident that the out door accommod- the benefit of our children. Their ations are altogether inadequate now health and comfort should be the without still further limiting them by first consideration, their education
